

THE TRAILS

The Trails at Lake LBJ is a residential development in the Texas Hill Country that offers a country club environment with neighborhood amenities. The ubiquitous golf course is replaced with horse trails, pastures and water features. DCA provided design for a 5,000 square foot clubhouse, entry gates, stables and a sales office. Heavy timber framing, local stone and metal roofs with deep eaves were used to reinterpret traditional clubhouse buildings and bring a regional Hill Country style to the project.
