

RI DGE LINE HOUSE

Situated atop a finger peninsula on Lake Travis, water and bluffs surround the Lakeside Residence on three sides. Shed roofs sweep atop the serpentine spine, transecting stone walls and enclosing spaces within the home. Local coursed limestone with tooled joints emphasize the horizontal qualities of the walls, flooring, and carefully grain-matched walnut while the clean lines of the client's collection of custom mesquite furniture and extensive artwork further complement the lines of the house, its millwork, and its details.
